1, Place Ville Marie, bureau 3900

Montréal (Québec) H3B 4M7

email@dancook.com

The board behind Les Amis de Mont-Tremblant (MontTremblant.org) is looking for a bilingual (French and English) non-transactional website that can be easily maintained and updated as needed. As such the proposed solution is a website built on the popular **WordPress** content management system (CMS) platform. Leveraging WordPress allows for several benefits, including:

- Quick to production: setting up a new server with the WordPress framework is quick, eliminating any technical obstacles commonly encountered with other frameworks
- Flexible design: From premium themes that can be purchased to endless custom design options, there is no limit to how a WordPress site can look
- User-friendly, code-free management: From updating website pages to adding new articles and blog posts, WordPress websites can be managed and modified by anyone with the most basic Microsoft Word (or equivalent) skills
- Low-cost hosting: WordPress is a highly efficient web framework, allowing for high performance and reactive websties even on discount hosting plans

The client already owns the monttremblant.org domain name. Should hosting be required, we recommend a \$15/month web hosting plan (billed quarterly) on Amazon's robust and scalable AWS network. **PLEASE NOTE:** This hosting only includes web hosting, not email.

Should email hosting be required, Google Workspace (Previously G Suite) can be purchased for \$8.20 per month per mailbox (billed quarterly), including setup.

"Friends & Family" pricing.

Hrs/Qty	Service	Rate/Price	Sub Total
10	Server and platform setup Provision new 1vCPU server with 1GB RAM Install MySQL, PHP, Apache Install WordPress and plugins	\$135.00	\$1,012.50
